## REPORT

OF THE ONE HUNDRED AND FIFTY-SIXTH ANNUAL  
MEETING OF THE CONTRIBUTORS TO THE PENNSYLVANIA HOSPITAL

---

PENNSYLVANIA HOSPITAL, 5th Month 6th, 1907.

At the one hundred and fifty-sixth Annual Meeting of the contributors to the Pennsylvania Hospital the day and year aforesaid, Joseph G. Rosengarten was called to the Chair, and John T. Lewis, Jr., was appointed Secretary.

The minutes of the last meeting were read and approved.

The Annual Report of the Board of Managers was read by T. Wistar Brown, which was accepted and referred to the incoming Board to print such matter as they may deem expedient.

The Annual Report of the Department for the Insane was read by Benjamin H. Shoemaker, which was accepted and referred to the incoming Board to print as much of it as they think proper.

An address by Joseph B. Townsend, Jr., showing the needs of the Hospital, was on motion referred to the incoming Board to use as they see fit.

JOSEPH G. ROSENGARTEN, *Chairman.*

JOHN T. LEWIS, JR., *Secretary.*

# PENNSYLVANIA HOSPITAL

At the 156th Annual Meeting of the Corporation, held 5th month 6th, 1907, the following contributors were elected to serve for the ensuing year :

## MANAGERS

BENJAMIN H. SHOEMAKER,	JOHN T. LEWIS, JR.,
T. WISTAR BROWN,	JOHN S. JENKS,
CHARLES HARTSHORNE,	ARCHIBALD R. MONTGOMERY,
JAMES T. SHINN,	HENRY H. COLLINS,
JOHN B. GARRETT,	JOSEPH B. TOWNSEND, JR.,
JOHN W. BIDDLE,	FRANCIS R. COPE, JR.

## TREASURER

EDWARD Y. HARTSHORNE, 409 Chestnut Street.

At the first meeting of the Managers the Board unanimously elected

BENJAMIN H. SHOEMAKER, *President.*

JAMES T. SHINN, *Secretary.*

## STANDING COMMITTEES

LOANS . . . . .	{ T. WISTAR BROWN, CHARLES HARTSHORNE, JOHN S. JENKS.
APOTHECARY SHOP . . . . .	{ JAMES T. SHINN, JOHN W. BIDDLE, FRANCIS R. COPE, JR.

*Clerk*, MILTON M. BERGEY.

*Clerk*, SAMUEL C. BOWMAN.

*Apothecary*, JOHN T. HARBOLD, P.D.

*Assistant Matron*, MARTHA G. BYERLY.

*Assistant Superintendent of Nurses*, EMMA C. LINDBERG.

# REPORT

OF THE BOARD OF MANAGERS TO THE CONTRIBUTORS  
TO THE PENNSYLVANIA HOSPITAL AT THEIR 156TH  
ANNUAL MEETING, HELD FIFTH MONTH 6TH, 1907

---

The following table shows the operations of the Pine Street Hospital—the Department devoted to the treatment of the sick and injured—during the past year:

Number of patients remaining in wards Fifth Month, 1906..	278
Received in the wards during the year.....	4100
Total number treated during the year.....	4378
Remaining in the wards Fifth Month, 1907.....	225

The number entering the Receiving Wards during the year was 27,660, of whom 4100 were transferred to the wards, as shown in the above table.

The magnitude of the operations of the Hospital may be in measure realized, when it is considered that the number of patients brought to the Receiving Wards averages nearly 76 for every twenty-four hours throughout the year, or at the rate of one every twenty minutes; and that the number received into the wards averages nearly 12 in twenty-four hours, or one every two hours; a like number being removed, generally restored to a degree of health permitting return to their accustomed business or domestic duties.

For a period of seven weeks during the latter part of winter and early spring, it was found prudent to decline admission of visitors to ward patients, owing to the prevalence in the City of diphtheria and scarlet fever. We were mercifully preserved from the intro-

duction of any such contagion among our patients, through such visits.

The ambulances have been in service 1608 times, and the police patrol wagons have made 2262 trips to the Hospital. This public service is a valuable auxiliary to the work of the Hospital, and is conducted with an efficiency which commends itself, prompting an expression of our grateful acknowledgment.

OUT-PATIENT DEPARTMENT OR DISPENSATORY

Number of new cases treated: Surgical, 10,861; Medical, 2345; Eye, 2091; Ear, 690; Nose and Throat, 1281; Gynæcological, 388; Mental and Nervous, 47; Dermatological, 1581. Total, 19,284.

Total visits to the Out-Patient Department, 60,631.

EXPENSES

The total expenses of the Department for the Sick and Injured the past year were \$152,124.47, which is \$9339.01 more than the previous year.

Of the total amount, as stated, \$8091.39 were expended for special nursing, mostly for private patients. In these cases, the cost is reimbursed by the patient, and may, therefore, be eliminated from the cost to the institution of conducting its charitable work.

The means for meeting this large expenditure were derived from the following sources:

From board of patients and refund of cost of special nursing .....	\$14,569.41
From income of Endowment applicable to general purposes .....	125,485.86
From donations for current expenses.....	2,704.50
From other sources, mostly temporary loans.....	9,364.70

It will be noted how very small a relation the receipts from patients bears to the whole cost of conducting this great charity. No State or municipal aid is

asked or received. The munificent endowment, gathered during the century and a half of the Hospital's existence, through bequests and donations, large and small, is still far from sufficient to meet the demand upon it; and were it not that the hearts of Philadelphia's charitable citizens beat in sympathy with suffering humanity, and prompt many liberal contributions towards the work, it would be impossible to meet the current expenditure, and the service of the Hospital would necessarily be seriously curtailed, or a debt incurred to burden our successors as well as ourselves.

We deem it due both to ourselves and our successors, in acquainting the members of the corporation with this situation, to call attention, also, to an important fact bearing upon the available resources of the Hospital. During its first century the Pennsylvania Hospital stood as an almost unique institution in our midst, with such a hold upon the citizens at large as made it easy to call upon them with every confidence that any need of the Hospital would be promptly and cheerfully met. The creation of new hospitals, scattered throughout the growing city, sustained either as adjuncts to medical schools or as integral parts of church work of the various denominations, has necessarily centred the interest of a very large proportion of Philadelphia's most charitably disposed citizens, and with largest pecuniary resources, in such younger institutions. They are doing efficiently a most valuable work. There is room for all. But the friends of the Pennsylvania Hospital need to be reminded that the present endowment falls far short of being adequate to meet its current needs; and that if efficient work is to be continued on its present scale of administration to the public need, a very substantial addition to the endowment available for general purposes must be made, or current contributions must be even more generously bestowed than in the recent past.

The following is a list of bequests and contributions received during the year, every one of which is gratefully acknowledged:

### BEQUESTS

From estate of Ellen K. Mitchell, deceased.....	\$4,848.95
From estate of Mordecai D. Evans, deceased, additional..	993.42
From estate of Joseph E. Gillingham, deceased, on account	12,500.00

The property, No. 914 Clinton Street, valued at \$13,000, devised to the Hospital by the will of Hannah C. Ralston, has also recently come into its possession.

### CONTRIBUTIONS

*For endowment of beds in Department for Sick and Injured—*

From B. Frank Clapp and Mrs. Matthew Semple, for free bed in name of Nathan T. Clapp.....	\$5,000.00
Employees of Bell Telephone Company for free bed in name of Theodore Spencer.....	5,000.00

*For endowment of beds in Insane Departments—*

From T. Wistar Brown.....	10,000.00
From Charles Hartshorne .....	10,000.00

*For endowment, available for general purposes—*

From the Misses Blanchard.....	15,000.00
--------------------------------	-----------

*For life memberships—*

John H. Gibbon, M.D.....	30.00
W. Estell Lee, M.D.....	30.00
William L. Du Bois.....	30.00
Alfred M. Collins.....	30.00
Benjamin H. Shoemaker, 3rd.....	30.00

*For current expenses—*

Joseph G. Rosengarten.....	150.00
Mrs. Albert Lucas.....	10.00
United Gas Improvement Company.....	200.00
William K. Ramberger.....	20.00
Henry H. Collins.....	300.00
Henry C. Lea.....	250.00
Francis R. Cope.....	100.00
William M. Meigs .....	75.00
Philadelphia Rapid Transit Company.....	100.00
Sallie Roberts Smith.....	200.00

Robert N. Willson, Jr., M.D.....	100.00
Mrs. George R. Fagan.....	100.00
Spreckels Sugar Refinery.....	100.00
In appreciation of treatment received.....	100.00
Cash .....	62.50
<i>For specific expenses—</i>	
From Mrs. H. C. Hart, her daughter, and her son, Dr. Chas. D. Hart, towards screening windows of Medi- cal Wards .....	200.00
John Story Jenks: For new condensers for Refrigerating Plant.....	360.00
For window screens.....	98.00
Alterations of 8th Street Driveway.....	179.00

A marble tablet has been placed in the Hall of the Hospital, bearing the following inscription:

1870 IN MEMORY OF 1906  
THEODORE SPENCER  
A FREE BED IS ENDOWED  
BY THE EMPLOYEES OF  
THE BELL TELEPHONE COMPANY  
OF PHILADELPHIA

On other tablets in the Hall are inscribed the names of many prominent citizens, who in their day, contributed largely to the funds of the Hospital, thereby making it possible with the contributions of the present generation to continue this great charity from year to year.

During the next fiscal year it will be necessary to incur an extraordinary expense of about twenty-two thousand dollars in the renewal of the whole stack of boilers at this Department, and the erection of a new chimney of larger capacity to supply the greater draught which these will involve. The present boilers have all reached an age at which common prudence suggests the desirability of renewal, and the extension of buildings, the introduction of electric lighting sup-

plied on the premises, added elevators and other demands have required a large increase of power in recent years, and admonish us that in replacing the old boilers, a liberal increase of capacity of steam generation should be provided. Contracts for all this work have already been authorized, and it is expected that before the opening of another winter, the work will have been completed.

The property, No. 815 Spruce Street, adjoining the Out-Patient Department on the east, has been purchased for \$12,000, affording opportunity for the needed expansion and improvement of this branch of our service, when means are supplied for building and for the increased cost of maintenance which must follow. The purchase of this property was met from a donation of Julia Garrett, reported last year, and with her approval.

To promote the comfort of the Superintendent of the Pine Street Hospital, and of his family, who have hitherto resided in the main hospital building, a dwelling-house is in process of erection on the property opposite the Eighth Street gate contiguous to the Nurses' Home at the southeast corner of Eighth and Spruce Streets. It is expected that this will be ready for occupancy in a few weeks and that rooms in the main building then to be vacated will be available for other administrative uses.

#### CHANGES IN THE STAFF

The following changes in the Staff have occurred during the year:

Dr. Frederic Montgomery was appointed Anæsthetizer, succeeding Dr. W. Earle Clarke, resigned.

Dr. J. Montgomery Baldy resigned as Gynæcologist in the Out-Patient Department on account of impaired health, and was succeeded by Dr. Astley P. C. Ashurst.

Dr. G. Canby Robinson, Assistant Pathologist, has been elected a Resident Physician, and has been succeeded by Dr. Egerton L. Crispin.

#### TRAINING SCHOOL

In addition to the primary work of the Hospital, the treatment every year of several thousand medical and surgical cases, a large auxiliary work of benefit to the community, is carried on in the training of nurses for the administrative work of this and other hospitals, and for private nursing. A generation ago, the nursing in the Hospital was done by an untrained body of men and women, in which frequent changes were necessarily occurring. Now, a well-organized corps of women, including a superintendent, an assistant superintendent, ten head nurses who are graduates, fifty-five pupil nurses and five probationers,—in all, seventy-one—render most efficient service. Under the old system the nurse received no special training beyond the limited range of duties with which he or she was continually charged. Under the new, each nurse is required to perform in turn the duties required of all, so familiarizing herself with the care of men, women and children, under both medical and surgical treatment. Except in cases where a course in the Drexel Institute is accepted as equivalent to a part of our own course, each nurse is required to remain three years before a certificate is given her that the course of study has been completed, and that she is qualified to perform the duties of a trained nurse. During the life within the Hospital each nurse is required to attend lectures given by members of the Out-Patient Medical and Surgical Staff, the Chief Resident Physician and Superintendent of Nurses and others, upon anatomy, physiology and hygiene, materia medica, medical and surgical nursing, massage, dietetics and other allied subjects.

On the evening of Third Month 13th, 1907, the following received the usual certificate of graduation:

MINNIE L. HOLZINGER,  
BERTHA G. McCONNELL,  
BERTHA M. SMITHCOORS,  
MARY POWELL,  
JENNIE C. MACNEAL,  
MARY C. SWANK,  
MARION G. JAMES,  
ELLA M. FERGUSON,

MERTIE McDONALD,  
M. EDITH RUDDICK,  
MARY C. SOLES,  
MARY E. GRAY,  
MARY E. HALE,  
MARY B. SHARPLESS,  
MARTHA F. KING,  
NELLIE SMITH.

The class was addressed by Dr. James Tyson, one of the Attending Physicians.

A growing inconvenience is experienced in conducting the training school because of the diminishing number of young women applying for such instruction. The same difficulty is found in other hospitals, and in many, if not all, parts of the country. The causes of this condition are not clearly evident, but the subject is claiming the serious consideration of superintendents of such schools, and other hospital officers, and it is hoped an adequate remedy may soon be found. Liberal pecuniary compensation is offered, both in private nursing and institutional work; but it may be well worth consideration by many employers of trained nurses whether all is done that is due, to promote the comfort, health and happiness of these young women, whose intelligent and devoted service contributes so largely to the comfort, health and happiness of those with whom their lot is temporarily cast. And on the other hand, those who are seeking means of livelihood, and at the same time opportunities of helping their fellow-men, will find in the profession of nursing a wide opening, especially attractive to strong, intelligent and conscientious workers.

The Superintendent of Nurses has recommended that an experiment be made of giving to each nurse,

while on day duty, one whole day in each week for rest and recreation. If successful in operation, it is believed it would contribute to the vigor of student nurses, be more acceptable to them and their friends, and increase the efficiency of the force. An increase of six in the number of student nurses enrolled would be needed to effect the change, involving an estimated increase of about \$2000 in the annual expenses of the Hospital, for their wages, board, and maintenance of their rooms.

During much of the past year, the health of Daniel D. Test, Superintendent of the Pine Street Hospital, has required cessation from work, and, at times, hospital treatment and the air and freedom of country life. His duties have been faithfully performed by the Clerk, Milton M. Bergey, as Acting Superintendent.

#### THE FARM

The large Farm near Newtown Square has continued to perform an important part in the administration of the several departments of the Hospital. It is the aim of the Committee entrusted with its management to produce a sufficient supply of milk of the best quality to meet the requirements of the three large families at Pine Street and in West Philadelphia, an aggregate averaging about 1200 persons. Potatoes are also raised in liberal amount for our own use, and some produce of the farm finds an outside market.

Of a total of 358,877 quarts of milk produced during the past year, there were

Furnished to the three departments of the Hospital,	
357,718 quarts; value .....	\$19,674.52
Sold outside, 1159 quarts; value.....	57.96
Other produce supplied to Hospital.....	236.30
Other produce sold outside.....	1,634.10
Total receipts from Farm.....	<u>\$21,602.83</u>

The Ashley House has been maintained throughout the year as a resort for convalescing patients from the Insane Department for Women, and the Caley House for several months during the warmer part of the year for similar cases from the Department for Men.

The Pennsylvania Railroad Company having located its low-grade freight line through the northern edge of the Hospital Farm, it was found desirable to sell to the Company not only the strip required for the line of railway, but about seven acres cut off from the remainder of the farm. In addition to the value of the land, compensation was made for a barn which was in way of the improvements, and after defraying the cost of the small amount of building made necessary by the changes, the remainder of the proceeds of sale was applied to the reduction of the cost of the farm.

#### AYER CLINICAL LABORATORY

Dr. Warfield T. Longcope, Director of the Laboratory, reports a steady increase in the amount of work done this year as compared to that of previous years. A total of 11,332 specimens have been examined, over one thousand more than were reported upon during the years 1905 and 1906. The routine examinations in clinical microscopy number 3673; but this scarcely gives an accurate idea of the amount of work which is actually done, for frequently one examination in the statistics includes several different procedures. Seven thousand one hundred and twenty-five urines have been examined, and 262 specimens have been sent to the laboratory from the surgical wards and operating rooms. These specimens are studied carefully, and a detailed account of the gross and microscopical appearance filed away for future reference. Under clinical bacteriology are catalogued blood cultures, and the bacteriological examination of various inflammatory conditions occurring in the Medical and Surgical

Wards. Of these examinations there have been 272. One hundred and twenty-one autopsies have been performed, in all of which routine bacteriological and histological examinations have been made.

Among other improvements, a radical change has been made in the method of preserving the laboratory records. The addition of a typewriter has greatly facilitated the clerical work, and has made it possible to preserve the records, which are now becoming quite valuable, in a readily accessible and readable form.

Another feature which has been slowly but steadily growing is the Laboratory library. The files of nine or ten medical journals are carefully kept and bound, besides which the reports from several American and foreign laboratories are received in exchange for the "Bulletin." These volumes, which are gradually accumulating, already form the nucleus of a very useful reference library, so necessary in the work of a hospital laboratory.

The third number of the "Bulletin" appeared in June, 1906, and preparations are being made for the publication of another volume in the early fall. The papers in the "Bulletin" now represent not only the work which is carried out by the immediate laboratory staff, but the results of very valuable investigations which are being made by students and physicians who act as voluntary assistants in the laboratory, as well as by members of the resident staff who have been making certain researches in clinical medicine with the application of laboratory methods.

Examinations of blood, feces, sputum, stomach contents, and	
Widal reactions .....	3673
Examinations of urine (routine).....	7000
Examinations of urine (special).....	125
Examinations in clinical bacteriology.....	272
Examinations in surgical pathology.....	262
Number of deaths.....	414

Number of autopsies performed by the Coroner.....	13
Number of autopsies performed by Pathologist.....	121
	<hr/>
Total number of autopsies performed.....	134

#### LADIES' COMMITTEE

We gratefully acknowledge the continued ministrations of the members of the Ladies' Committee to our patients. Frequent visits are made to their bedsides when words of sympathy and cheer are spoken, and they are encouraged to simple faith in the Physician of souls, and to lives of moral uprightness. Seasonable opportunities are occupied in reading to those who are able to bear it, and who are appreciative of such attention.

Religious services have been conducted as heretofore, both on the first day of the week and on a week-day evening, participated in by officers of the Hospital and interested visitors. These services are attended by patients who are able to leave the wards, by many of the nurses, physicians, and other members of the family, and are much appreciated.

#### DEPARTMENT OF THE INSANE

Dr. John B. Chapin, Superintendent and Physician-in-Chief of the Department for the Insane, reports:

Number in Hospital Fourth Month, 1906.....	446
Admitted during the year.....	225
Total number treated.....	671
Discharged .....	218
Remaining Fourth Month, 1907.....	453
Of the number remaining, 196 are men, and 257 are women.	

The cost of this Department has been:

Hospital for men.....	\$ 96,769.50
Hospital for women.....	145,214.41
Making a total of \$241,983.91.	

For further interesting details of the operations of this Department, including valuable statistics of results of hospital treatment in the recovery or improvement of the thousands of cases which have come under his care in his superintendency of nearly twenty-three years, we refer to the report of Dr. Chapin accompanying this report. We also commend to the careful attention of all interested his mature and well-balanced views of the duty of the state to its insane poor, and the merits of properly located and conducted State institutions for the care and medical treatment of these dependent ones, as compared with their confinement in county almshouses or hospitals.

In concluding this report, we would acknowledge the hearty co-operation and faithful service of the Superintendents, physicians, and other officers of the several Departments, and above all the guidance and blessing of Him without whose gracious care every effort must be in vain.

On behalf and by direction of the Board of Managers,

BENJAMIN H. SHOEMAKER,  
*President.*

JAMES T. SHINN,  
*Secretary.*

# RECEIPTS AND PAYMENTS

OF EDWARD Y. HARTSHORNE, TREASURER OF THE PENNSYLVANIA HOSPITAL, FOR THE YEAR ENDING  
FOURTH MONTH 22d, 1907.

## RECEIPTS

Balance on hand Fourth Month 23d, 1906.....	\$8,142.86
Income of invested funds for general purposes:	
Ayer Clinical Laboratory.....	\$1,840.00
Ayer Publication .....	600.00
Capital Stock (including produce Delaware County Farms, \$19,875.63)	71,053.53
L. Taylor Dickson.....	5,438.73

Managers Pennsylvania Hospital, \$110.00.  
Lady Visitors, Pennsylvania Hospital, \$48.50.

## TO THE NURSES.

The Misses Blanchard, \$50.00.

Dr. Doland, encyclopædia.

A “grateful patient,” electric lamp for sick-room.

## WORK DONE FOR THE HOSPITAL.

Friends Dorcas Society, 1336 pieces.

Dorcas Society of St. Luke’s Church, 192 pieces.

# STATISTICS

SHOWING THE NUMBER OF PATIENTS TREATED, THE  
COST OF MAINTENANCE, ETC., FOR THE YEAR ENDING  
FOURTH MONTH 27TH, 1907

Number of patients remaining in the Hos- pital Fourth Month 28th, 1906—pay, 13; free, 265; total.....	278
Patients admitted during the year—pay, 198; free, 3,902; total.....	4,100
Total number treated in the Wards during the year.....	4,378
Number of Patients treated in the Re- ceiving Wards, and not remaining in the House.....	23,560
Number of out-patients treated during the Year .....	19,284
Total number of patients treated.....	47,222
Number of patients remaining in Hospital Fourth Month 27th, 1907—pay, 10; free, 215; total.....	225
Average daily number of patients main- tained in the wards—pay, 9.69; free, 230.78; total.....	240.47
Average stay of each patient, days.....	20.05
Cost for maintenance of in- patients .....	\$139,624.47
Approximate cost of out-pa- tient service .....	12,500.00
Total expense for the year.....	\$152,124.47

Average cost per day for each in-patient..	\$1.59
Average expense to the Hospital for each out-patient .....	.29

Of the patients discharged	
The number cured was .....	2,245
“ “     relieved .....	1,281
“ “     removed without material improvement .....	213
“ “     died .....	414
	<hr/>
	4,153

Of the 414 deaths, 47 died within twenty-four hours after admission.

Since the foundation of the Hospital, in 1751, there have been admitted to the beds in the wards 177,083 patients, of whom 132,027 were poor persons, supported at the expense of the institution.

Of these 177,083 patients there have been:	
Cured .....	119,144
Relieved or improved .....	30,282
Left the Hospital without material improvement .....	10,047
Died .....	17,385
Remaining .....	225
	<hr/>
	177,083

Since the reorganization of the Out-Patient Department in 1872 there have been treated 325,034 out-patients, making 172,717 visits.

# REPORT

OF THE PHYSICIAN-IN-CHIEF AND SUPERINTENDENT OF  
THE DEPARTMENT FOR THE INSANE OF THE PENN-  
SYLVANIA HOSPITAL

TO THE MANAGERS OF THE PENNSYLVANIA HOSPITAL:

The following report of the Department for the In-  
sane for the year ending Fourth Month 25th, 1907, is  
herewith presented:

	MEN.	WOMEN.	TOTAL.
The number of patients in the Hospital			
Fourth Month 26th, 1906.....	189	257	446
Admitted during the year *.....	106	119	225
Whole number treated.....	295	376	671
Discharged .....	99	119	218
Remaining Fourth Month 25th, 1907.....	196	257	453
Daily average during the year.....	187	255	442

## RESULTS OF THE YEAR

	MEN.	WOMEN.	TOTAL.
Recovered .....	26	40	66
Much improved .....	6	30	36
Improved .....	21	13	34
Stationary .....	17	13	30
Died .....	14	22	36

## RESULTS SINCE THE OPENING OF THE NEW HOSPITAL IN 1841

	MEN.	WOMEN.	TOTAL.
Recovered .....	2516	2589	5105
Improved .....	1604	1757	3361
Stationary .....	1191	680	1871
Died .....	1089	863	1952
Total .....	6400	5889	12,289

\* Of the number admitted during the year fifteen were cases of  
alcohol and opium habit. They do not appear in the Table of  
Results.

The whole number admitted into the Pennsylvania Hospital prior to the opening of the Department in West Philadelphia in 1841.....	4,360
Admitted into the Department in West Philadelphia since its opening in 1841.....	12,336
Total .....	16,696

Of the patients discharged “recovered,” ten were residents of the Hospital less than one month; twenty between one and three months; twenty-five between three and six months; seven between six months and a year; and four for more than a year.

Of those discharged “much improved,” four were in the Hospital less than a month; twelve less than three months; thirteen between three and six months; five between six months and one year; and two for more than a year.

Of those who “died,” three were in the house less than a week; two less than a month; two less than three months; two between three and six months; four between six months and a year; seventeen had been residents of the Hospital for a period longer than a year; one between ten and twenty years; three for twenty-five years; one for forty years; and one for forty-four years.

It will be observed there was an increase in the admissions and the number discharged in the year just closed, as compared with previous years.

The percentage of recoveries for the year was thirty-one. This result is obtained by ascertaining the ratio that the number discharged as recovered bears to the number of admissions for the year, excluding cases of the alcoholic and drug habit. During a period of nine years the average per cent. of recoveries has been thirty-one.

The mortality, based on the whole number treated, was five per cent. No death occurred from tuberculosis, nor has any case developed.

The number of patients admitted with a history

DEPARTMENT FOR WOMEN—THE VILLA

indicating a probability of a favorable result from treatment was fifty per cent. The remainder were cases of chronic mental disease, or organic brain degeneration, requiring for some cause custodial care. The managers' committee have not thus far been disposed to adopt a rigid rule to exclude every applicant that did not present a prospect of recovery, but have exercised a wise discretion in limiting the admission of chronic cases when it was clear that by so doing a great relief was afforded, both to the patient and to the family, and when the cost of support was fully paid. This policy has a practical illustration in the interest shown in recent years in making provision for persons suffering from incurable diseases. Hospitals are now organized for the special care of those suffering from chronic diseases, as tuberculosis, cancer, and other infirmities. Even the study of incurable diseases has had an interest for physicians, and has resulted in the mitigation of suffering and enlarging the sphere of human sympathy in the community.

The number of weeks that patients who were discharged recovered were under treatment averaged fifteen. This result is to be considered gratifying, but is hardly a fair criterion to enable an expectancy in every case. Recovery has so often taken place after prolonged treatment that averages may prove unreliable in comparing the results of several successive years. There has been, however, a marked reduction in the number of weeks.

The percentage of recoveries, and the average number of weeks recovered patients were under treatment, are results much more favorable than in previous years.

As a part of the hospital experience of the past year, and of other years, it may be proper to report the occasional admission of a patient certified to be insane and in a state of confusional delirium, evidently the result of excessive drugging with hypnotics. There

may be a proper use of hypnotics in prolonged insomnious conditions, as there is also an abuse in the administration of medicines of this character. The condition of a patient is sometimes further complicated by an additional autotoxic pathological state, prolonging recovery, and even endangering human life.

This Hospital has performed a public service in admitting a number of recoverable patients without charge, and at a rate below the cost of support, whose support otherwise would have devolved upon the State.

The publication of hospital reports and statistics of insanity affords an opportunity for some speculation as to the increase of this disease. If any inference can be drawn from the number of admissions to incorporated hospitals receiving mainly private patients, there is no appreciable or abnormal increase. A number of private sanitariums, so-called, make no reports. The incorporated hospitals of other states do not show any demand for accommodation beyond the capacity of the hospitals. The private hospitals and sanitariums of a neighboring state have, according to a late report, four hundred and forty-nine vacant beds—a statement which would confirm this opinion. On the other hand, the public hospitals of this and neighboring states are crowded and overcrowded. These institutions receive mainly patients from the wage-earning classes, and those in moderate and indigent circumstances. That there is an increase of insanity in these classes that is abnormal, is conceded to be unquestionable. There are causes of mental disease that are definitely preventable; other causes exist that are non-preventable, and about the remainder there is a large field for speculation. The last United States Census report has contributed most valuable statistics confirming our own observations.

It is evident that with means at command the early indications of ill-health may be averted by seeking

ASHTY HOUSE—DEPARTMENT FOR THE INSANE

medical advice, and the ability to follow it. Overwork, the strain and distress incident to existence, intemperance of all kinds, vice, and what in latter days have been called the strenuities of life, or whatever may be inconsistent with the "Simple Life," are causes which make increasing annual contributions to mental degeneration and insanity. To improve and promote a higher standard of living and thinking is a field that may be especially entered by the teacher of the young in the Sunday and day school, in the college and university, and by the minister on the day set apart for rest and the inculcation of the teachings and examples of Sacred Scriptures and holy lives. In the tables of causes of insanity which have a place in some annual reports of hospitals, and in others have been omitted altogether as being too speculative, the influences and conditions which have been named in a general way have been properly designated respectively as "moral" and "physical" causes. Who can doubt that moral agencies in active operation, if needed, would have a vast influence for the welfare of individuals and communities, and that many of the sad experiences of life would be avoided! They would have a place and an influence in the direction of "preventive medicine," which occupies so large a place in the work and thought of physicians.

In the meantime, the pressure for admission to the hospitals, of persons not possessing adequate means for support, for whom the State has made no satisfactory provision, does not abate. The overcrowded condition of the public hospitals, which has been a subject of recent official report, has produced an unfortunate impression and prejudice in the public mind. At the weekly meetings of your committee the managers have experienced both sympathy mingled with embarrassment in disposing of the applications. If all were accepted from sentiments of sympathy alone, the beds

would soon be filled, and not a vacancy for recent and emergency cases would exist—except as death occurred. It is a most urgent and imperative matter that the public hospitals should be so modified in respect to their plans, their furnishings and administration that they will merit and actually have the confidence of the people, and the moral support of public officials. For various reasons these two conditions do not exist at the present time. The feelings of the friends of these afflicted persons are deserving of much consideration, and the people of the State will never hesitate about a tax necessary for the proper care of the insane. The officers need the co-operation and the sympathetic support of public officials, rather than criticism and suspicion on account of a state of things and for conditions for which they are in no way responsible.

On the invitation of your Board, the Association of Trustees, Managers and Physicians of Hospitals for the Insane held a session on the Seventeenth day of May, 1906, at your Departments for the Insane, and visited all of the wards. This was the seventh semi-annual meeting held at six of the hospitals of the State during the past three years. The object of the organization has been to inspect and hold sessions at all of the hospitals in rotation for the purpose of observing and inspecting their condition, and for the discussion of questions relating to administration. An address of welcome was made by John B. Garrett. Allusion was made to the fact that the earliest movement for the care of the insane in Pennsylvania was made by the founders of your Hospital. If it was a proper and praiseworthy purpose for the founders to ask for sympathy and aid in establishing a hospital, it was a satisfaction to show to the guests of the managers how the trust that had been transmitted to them had been executed. As the condition of the insane poor of the Province had been such as to inspire pity and an

PENNSYLVANIA HOSPITAL FOR THE INSANE

effort to ameliorate their condition, so at the present period in the history of the State the Contributors and Managers can not feel indifferent to the condition of this class. If the members of your Board at an early period made sacrifice of their time, and contributed of their means, sympathy and advice to found a hospital for the sick, the hurt and the insane, they still have an interest in every organization, system, or plans that seek to elevate the standard of care of our hospitals. They cannot be expected to be in accord with any system or scheme that looks to the lowering of a suitable standard of care. The highest standard of care the State may adopt will not be too good.

It was stated by the President of the Association on the occasion of this meeting that any scheme of state care ought to be uniform in respect to its standard of service. It should be comprehensive—that is, one that would bring all under state care. It should have reference in the plans to the general but steadily increasing yearly demands. There should be a recognition of some general principles as :

*First.*—That the care of the insane shall be distinct and separate from those of the county almshouse who are not insane.

*Second.*—That it is right to ask that the insane shall be regarded as subject to a condition of disease, for the treatment of which they should be placed under the care of physicians and not so-called “ wardens or keepers,” who may be selected and changed according to the dictates of political influences, and not for any special fitness.

*Third.*—That it shall be obligatory upon all judicial and county officers having to do with the indigent insane that they shall commit every case of insanity to a hospital, and that it shall not be legal to transfer recent or probably recoverable cases to a county poor-house, under any circumstances, for permanent detention.

In justification of these principles we can appeal confidently to the consensus of the judgment of the medical profession of the State, as well as to all benevolently disposed citizens.

	INSANE
In 1883 there were in State Hospitals.....	2153
In 1883 there were in Almshouses.....	2127
Total .....	4280
In 1887 there were in State Hospitals.....	4222
In 1887 there were in Almshouses and Blockley.....	1473
Total .....	5695
In 1904 there were in State Hospitals.....	7139
In 1904 there were in Almshouses and County care.....	4838
Total .....	11,977
In 1906 there were in State Hospitals.....	7926
In 1906 there were in Almshouses and County care.....	5579
Total .....	13,505

In 1887, there were 898 insane in almshouses in the State, exclusive of Philadelphia county. These figures, without entering into any analysis, or suggesting any hypothesis to explain what may seem abnormal increments, present another problem somewhat more difficult than merely the relief of existing overcrowded hospitals. There should be a broader consideration of the subject. From the figures of the years 1904 and 1906, the annual increment approximates nearly eight hundred. The expectancy, which to some may seem excessive, therefore, is that in ten years, if this rate continues, the whole number under state and county care will reach twenty thousand. If the present system of provision prevails one new hospital erected every year on the usual plans will hardly meet the requirements. If at an earlier day, with a small population comparatively, it seemed sufficient to erect one state hospital (1851) to be followed by others at long intervals, the present conditions have so changed that

there must be a departure from plans usually adopted. There has been a great gain of experience in the care of the insane, in our knowledge of insanity, a necessity of a wider classification of various forms, and for adaptation of plans of construction to numerous conditions. The probable increase of cases should be recognized, and plans adopted capable of economical expansion. All of the insane do not require for their care the same kind of expensive construction. A large proportion of state patients are accustomed to an open, outdoor life, and in the varied occupations about a farm they find familiar and congenial employment.

The problem of making provision for all classes of the insane is one that at some period confronts every state, but is not a new one in other states. Something can be gained by observing how efforts in those states have been made to solve it, and to learn from their experience what to avoid.

In every hospital are to be found a certain number of patients in the recoverable stage, and for their restoration a special medical and nursing service might be furnished. This service can best be rendered in a small block equipped with all appliances necessary for the treatment of acute cases. Such a block, capable of accommodating eight per cent. of the whole population, would probably be ample. There would be required plans for classes of chronic, turbulent, dangerous patients, who for any cause require careful surveillance. There still remain two classes to provide for, one a class of helpless demented of untidy habits, and the other composed of those of quiet, industrious, orderly habits. The last class, under the system of administration, would be constantly recruited from other classes. The cost of maintenance of a large hospital population in such a scheme would be reduced, and the construction cost would be lowered from one-third to one-half of what has been ordinarily expended.

The variety of occupations for both sexes which such a community would furnish would be not unlike that to be found in a village of two thousand to twenty-two hundred. It should not be contemplated that a single great structure would be erected, but the location of buildings in blocks would have some relation to the varied occupations to be pursued. There would be segregation,—not congregation—carried out in such a plan. A scheme such as is outlined can be expanded to the extent of good administration.

At one period there was a pronounced sentiment favorable to the state care of all of the insane, but during twenty years there has been a reactionary policy in the direction of county care; so that according to the last reports 5579 insane persons are in county care hospitals and in almshouses. Believing in the principles which have been enumerated, we shall continue to think the change in the policy of the State is a mistaken one. To the self-respecting indigent classes it seems an added calamity to consign a relative to an almshouse, or to a county hospital with all of its associations. If they have in their way contributed a farthing to the welfare of the Commonwealth, they have a moral claim for humane and scientific treatment, and that their feelings may have respectful consideration. It is a part of the weekly experience of your Managers' Committee to receive appeals for the admission of distressing cases which they feel obliged to decline. They feel it is a proper part of their duty, under the circumstances, to bring the facts to public notice, in the hope that its sympathy may be invoked.

In the life of a great plant like your Hospital there is a gradual deterioration requiring renewals, and even a desire for improvements such as experience suggests.

It is a great satisfaction to be able to present a favorable report of the results of the year and that no calamity has occurred. There has been a hearty co-

STATUE OF BENJAMIN FRANKLIN  
on the grounds of the Pennsylvania Hospital for the Insane

operation on the part of the physicians, officers, and others engaged in various offices in carrying forward the great work committed to you, and in the regular performance of the medical service of the Hospital.

Doctors Nunemaker, Moulton, Phillips and Williams have given oral instruction to nurses during the winter. They have in rotation attended at the outpatient department of the Pennsylvania Hospital on Spruce Street. During the year one hundred and twenty-three visits were made to this department by patients for advice.

Ashley House, and Caley House on the Delaware County farm, have been open for our patients. Four hundred and thirty-six visits were made by patients to these houses, and the equivalent of six hundred and eight weeks were spent there, in many instances with great benefit.

William M. Walter has performed the various duties of Steward, and his report will be found in detail in the appendix of this report. There has been an increase in the cost of maintenance. The administration of his department has been attended with honor, but not with profit in a strictly business sense.

Attention has been given to the importance of diversion and entertainment of patients to dispel somewhat the monotony of hospital life. Every evening of the year, except during the summer months, has been occupied. In addition to the exhibition of stereopticon views and the calisthenic exercises, we have been enabled through the considerate and generous contributions of friends of the hospital to furnish sixty-one concerts and other entertainments.

The Lapsley Pavilion, located on the grounds, continues to be a resort for patients who seek rest. It has been much appreciated by those who desire a quiet place for reading or diversion in a beautiful room separate and apart from the Hospital wards.

The Gillingham Memorial continues to be a valued acquisition to the means for treatment.

We have the pleasure of acknowledging with many thanks other contributions made by friends who have shown their interest in our work, viz:

Mr. T. Wistar Brown, \$200 for the amusement fund; Mr. Henry H. Collins, \$200 for the amusement fund; Miss Anne Thomson, Mr. Clarke Thomson and Mr. Frank Thomson, \$300 for the amusement fund; Mrs. Thomas Williams, \$25 for the amusement fund; Mr. Florence J. Heppe, \$5 for the amusement fund; Mrs. J. C. Patton, \$10 for the amusement fund; Miss Sophia Berger, \$5 for the amusement fund; Mr. George L. Crawford, \$50 for the amusement fund; Mr. T. Wistar Brown, \$200 for Christmas; Mr. Walter Tomkins, \$25 for Christmas; Mr. J. M. Frank, \$50 for Christmas; the Misses Sterrett, \$15 for Christmas; Miss Charlotte Ingham, \$1 for Christmas; Mr. Clarke Thomson, \$50 for Christmas; Mrs. Spencer Miller, Christmas cards; Mr. Henry H. Collins, \$200 for special improvements at the Villa; the administrators of the estate of Alexander Derbyshire, a pier glass; the Rhena L. Ramsay donation of music box; Rev. J. L. Scott, \$5.00; Mrs. Lightner, \$5.00; the Franklin Fire Insurance Company, two subscriptions to Harper's Monthly Magazine; the publishers of "The Advocate"—three copies; Captain Joseph L. Wilson, magazines; Mrs. Watson, books; Mrs. Perot, books; Mr. Charles Hancock, books.

I have to thank the Board of Managers and the Attending Managers for their kindly interest and sympathetic co-operation in the many details and concerns of this department of your Hospital as they have been presented.

JOHN B. CHAPIN.

# ADMISSION OF PATIENTS

INTO THE PENNSYLVANIA HOSPITAL FOR THE INSANE \*  
AT PHILADELPHIA

---

All classes of insane persons, without regard to the duration of the disease or its curability, are admitted into this institution. Idiots, however, it may be stated, are not received; and for the epileptic a special agreement should be made.

Preparatory to the reception of a patient, it is necessary to arrange the rate of weekly charge with a member of the Board of Managers,† and to furnish a certificate of the patient's insanity from two physicians, both of whom must be residents of Pennsylvania, who shall have examined the patient within one week of its date, and the certificate shall bear date within two weeks of the admission of the patient, and the same shall be acknowledged and sworn or affirmed to before some magistrate or judicial officer [*not before a Notary Public*], as required by an act of the Legislature of Pennsylvania, approved 1883. An "Order for the reception of a patient"‡ must be signed by a near relative

---

\* *This is the only title of this institution, and the only proper direction for letters, etc.* Other names, occasionally used, are liable to make confusion by confounding it with another institution in the same vicinity.

† The names of these gentlemen will be found in the front of this Report, and their places of residence can be learned, on application at the Hospital, on Eighth Street, between Spruce and Pine, Philadelphia, where blank forms for physicians' certificates, bonds, etc., can always be obtained.

‡ Legal forms of certificates and admission papers furnished at the Hospital.

or friend. Full and complete answers should also be given to questions in "Statement."

For the payment of board, and removal of a patient when discharged, security is always required from some responsible resident of the city of Philadelphia. Payment of board is always to be made quarterly in advance; and if the patient is removed *uncured*, before the expiration of the first three months, and contrary to the advice and consent of the Superintending Physician, board is required for thirteen weeks; otherwise the charge is only for the time actually passed in the Hospital, provided the time is more than four weeks.

Interest will be charged on bills not paid till after the expiration of the quarter.

Large chambers and private attendants can always be supplied, if desired by the friends of the patients.

A patient who is not a resident of this State, and other emergency cases manifestly insane, may be brought direct to the Hospital, where they may be received if the patient is manifestly insane and remain till the necessary medical certificates and the approval of the Managers can be procured, provided this be done within forty-eight hours. Whenever possible the papers should be completed before admission.

---

The following are the forms for physicians' certificates, order for the reception of a patient, and the bond that is to be executed before the order of admission is given:

#### ORDER FOR THE RECEPTION OF A PATIENT

I, \_\_\_\_\_, the undersigned, hereby request you to receive \_\_\_\_\_, an insane person, as a patient into the Pennsylvania Hospital for the Insane, believing that such detention is necessary for \_\_\_\_\_ benefit. Subjoined is a statement respecting the said \_\_\_\_\_.

Occupation, \_\_\_\_\_

Degree of relationship (if any) or other circumstances of connection with the patient.

Dated this \_\_\_\_\_ day of \_\_\_\_\_, one thousand nine hundred \_\_\_\_.

To the Board of Managers of the Pennsylvania Hospital for the Insane, Philadelphia, Pa.

CERTIFICATE OF PHYSICIANS \*

We, the undersigned, residents of Pennsylvania, hereby certify that we have, within one week prior to the respective dates hereinafter mentioned, at \_\_\_\_\_, in the county of \_\_\_\_\_, separately examined \_\_\_\_\_ of \_\_\_\_\_, and do verily believe that the said \_\_\_\_\_ is insane, and that the disease is of a character of which, in our opinion, requires that the person shall be placed in a hospital or other establishment where the insane are detained for care and treatment.

We further certify that we have been actually in the practice of medicine for at least five years, and that we are not related by blood or marriage to the said \_\_\_\_\_, nor in any way connected as a medical attendant or otherwise with the Pennsylvania Hospital for the Insane or other establishment in which it is proposed to place the aforesaid.

\_\_\_\_\_, M.D.  
Residence, \_\_\_\_\_.  
Dated this \_\_\_\_\_ day of \_\_\_\_\_, one thousand nine hundred \_\_\_\_.

\_\_\_\_\_, M.D.  
Residence, \_\_\_\_\_.  
Dated this \_\_\_\_\_ day of \_\_\_\_\_, one thousand nine hundred \_\_\_\_.

---

\* As required by the law of Pennsylvania, approved 1883.

## CERTIFICATE OF A JUDGE OR MAGISTRATE \*

I, \_\_\_\_\_, a \_\_\_\_\_, of \_\_\_\_\_ county of the State of Pennsylvania, do certify that the foregoing certificate was duly † \_\_\_\_\_ to before me by the above-named \_\_\_\_\_ and \_\_\_\_\_ on this \_\_\_\_\_ of \_\_\_\_\_, 19\_\_\_\_, that the signatures thereto are genuine, and that the signers are physicians of good standing and repute.

\_\_\_\_\_ [L. S.]

## EXTRACT FROM LUNACY LAW

SECTION 19. *The certificate above provided for shall have been made within one week of the examination of the patient and within two weeks of the time of the admission of the patient, and shall be duly sworn to or affirmed before a judge or magistrate of this Commonwealth AND OF THE COUNTY WHERE SUCH PERSON HAS BEEN EXAMINED, who shall certify to the genuineness of the signatures and to the standing and good repute of the signers. Any person falsely certifying as aforesaid, shall be guilty of a misdemeanor, and also liable civilly to the party aggrieved.*

*Approved—The 8th day of May, 1883.*

## OBLIGATION ‡

In consideration of \_\_\_\_\_ being admitted as a patient into the “*Pennsylvania Hospital for the Insane*,” established and maintained by “*The Contributors to the Pennsylvania Hospital*,” we do jointly and severally promise to pay to the Steward of the said Hospital, or to his order, quarterly, in advance, \_\_\_\_\_ dollars \_\_\_\_\_ cents per week for board, and to provide or pay for all requisite clothing and other things deemed necessary or proper for the

---

\* Certificate of a Notary Public will not be accepted.

† Sworn, or affirmed.

‡ This obligation is to be signed by two responsible persons. The surety to be a resident of the city of Philadelphia, if practicable.

health or comfort of said patient; to pay for all glass or furniture broken or destroyed by said patient; to remove ————— when discharged; and if taken away *uncured*, against the advice and consent of the Superintending Physician, before the expiration of three calendar months, to pay board for thirteen weeks; or if removed, or discharged, within four weeks, with his approbation, to pay board for four weeks.\*

Witness our hands the ——— day of ———, 190 .

————— [L. s.]

————— [L. s.]

The above preliminaries having been complied with, an order is given by a Manager, authorizing the Physician of the Institution to receive the patient.

Letters relative to the admission of patients into the Department for the Insane and other correspondence may be addressed to any of the Managers or to DR. JOHN B. CHAPIN, Pennsylvania Hospital for the Insane, Forty-fourth and Market Streets (West) Philadelphia, Penna. [4401 Market Street.]

Entrance to "The Department for Men," on Forty-ninth Street, between Market and Haverford Streets.

Entrance to "The Department for Women," on Market Street, corner of Forty-fourth Street, or, 4401 Market Street.

Out-Patient Department of Pennsylvania Hospital for Mental Disorders, corner of Spruce and Darien Streets, Mondays and Fridays, 3 to 4 P.M.

Long Distance Telephone Connections:

Department for Men, Telephone Number, Preston 2567.

---

\* If the patient recovers before the expiration of the period paid for, and leaves with the full approbation of the Physician, the excess is refunded, unless that time should be less than four weeks, for which period board is always required.

Department for Women, Telephone Number, Preston 2572.

SUBSCRIPTIONS AND DONATIONS will be received by any member of the Board of Managers, or by the Treasurer, Philadelphia.

LEGACIES intended to promote the interests of the Pennsylvania Hospital should be given in its corporate name, viz.: I hereby give and bequeath to "THE CONTRIBUTORS TO THE PENNSYLVANIA HOSPITAL" and their successors and assigns forever (if real estate), all that, etc. (if personal property), the sum of, etc.

LEGACIES intended for the Department of the Insane should specify, in addition, "to be devoted to extending or improving the accommodations, and for the care of the insane."

Contributions of books, periodicals, pictures, engravings, curiosities for the museums, and whatever can tend to interest or occupy the patients, are always thankfully received.

Every contribution or legacy of \$10,000 adds one FREE BED to the number already in use for indigent, recent, and probable curable cases in the Department for the Insane.
